

Consulting Foresters - Northeast Ohio

The following foresters provide forestry services to private landowners in Northeast Ohio. This list is designed to guide landowners to foresters more likely to provide services in the northeast region of Ohio.

The Society of American Foresters (SAF) professionally certifies individual foresters who are degreed and meet the professional standards of SAF. SAF also allows approved members, who have met their standard of educational requirements, to add their name to the list of consulting foresters.

A comprehensive statewide list of all SAF Foresters interested in provided consulting forestry services is available by e-mailing me at. ryan.clester@dnr.state.oh.us

This modified list is simply a guide to those foresters more likely to work the region or who are routinely working in the region. References for recently conducted sales should be requested from the forester if you have any questions about their credibility.

You will not often see Consulting Foresters advertise in local papers. Most are very busy. This is not an all-inclusive list. There are foresters working the region do not want on the list due to existing extensive work loads.

Forestry Services provided by Consulting Foresters includes, but is not limited to:

1. Writing Forest Management Plans for the property tax reduction programs and cost share programs available to landowners.
2. Conducting managed timber sales where the trees to be cut are individually marked, measured, and presented to multiple buyers for bid. Foresters then oversee the sale to insure contract compliance.

3. Evaluate timber for timber tax cost basis. Establishing a basis reduces taxes when timber is sold.
4. Marking of "Release Thinning". Foresters will identify which trees need to be killed in the woodland to improve quality, growth, and wildlife habitat.
